

S07

Exactly the same as the S04 in almost every respect, the S07 gives you all you need, at a more measured top speed of 6mph.

THE SAME MANEUVERABILITY

Like its big brother, the S07 is relatively light on its feet and compact in size for an on-the-road scooter. 49" in length and less than 200lbs in weight makes them both pretty nippy.

THE SAME DRIVING PLEASURE

The only difference in the way the S07 drives is the speed, making it ideal for the pavement rider, who likes the idea of speedier road riding when they need it.

THE SAME CLEVER FEATURES

The beauty of the S07 is that it comes with all the good looks and safety features you need, just at a steadier pace.
